

Subject: *ADL Universal Header Tanks* **Date of Issue**
15/03/2013

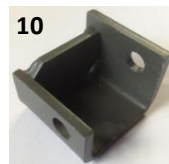

We have extended our range of long-lasting ADL header tank kits. The tank is manufactured from aluminium coated steel and is externally finished with black electrostatic powder paint. This provides significant longevity over both the plastic & mild steel versions that exist in the marketplace.

PL13906K is a universal kit & provides great flexibility whilst PL25969K, PL26231K, PL26226K and PL26232K come ready to fit with fittings installed in the correct ports equivalent to the ADL part numbers. All kits are complete with pre-formed tank straps to further assist in rapid replacement.

You will find listed below – cross-reference/application information, kit contents, schematic layout and images of the individual parts.

Please do not hesitate to contact our sales office for further details.
