

Subject : Partline - Organic Silicone Hose - P.O.S.H. - Identification Guide

Date of Issue
05 / 07 / 2018

Partline in conjunction with the manufacturer Leyland Hose and Silicone (LHSS) have addressed the issues of early failure due to the effect of OAT coolants and have developed a specific **long-life** OAT resistant range of hoses (P.O.S.H. – Partline Organic Silicone Hose)

This moves away from the traditional coolant hose construction, all of our POSH range combines added security by providing a minimum of **4 plies**, combined with a **2mm** tube liner and the woven fabric (**Meta-Aramid**) also reduces the amount of dilation in the hose and hence, reduces the tendency for flex cracking.

We are so confident in this product – we offer a 5 year warranty.
